

The Ladybug and The Auditor [\(Matt Hawkins\)](#)

The [Ladybug](#) represents [good luck, happiness and new beginnings](#).

In some religions, ladybugs, also affectionately called "[ladybirds](#)", are the gatekeepers of heaven.

Ladybugs serve as natural pest control agents, with their appetite for harmful insects—[especially aphids](#).

As your next State Auditor, I will be your ladybug to bring much needed oversight by auditing and cleaning up the wasteful monies - your tax dollars - being spent by Washington State government agencies.

I will clean up excess government regulations that are overburdening our businesses. I will ensure that taxes are being properly allocated to wipe out possible fraud and abuse.

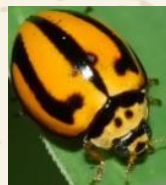

By overseeing and reducing excessive government waste as your next State Auditor, this will translate to saving Washingtonians millions of dollars.

Please join me in returning the government back to its original intent.

Let's work together to restore Washington State, for ALL people.

With heartfelt thanks and gratitude,

Matt Hawkins (R)
for WA State Auditor
